## Thetahealing® Courses

### Basic DNA

The Basic DNA Seminar introduces the techniques and philosophy of ThetaHealing®. You learn to apply the basic techniques for yourself.

The focus is on the techniques that release us from old and deep life patterns, blockages and fears that block and prevent us from progressing on the core, genetic, historical and soul levels. You open yourself to the unconditional love of creation energy and learn to recognize and dissolve your own blockages. These applications show the body how to replace restrictive beliefs or negative feelings with new, positive ones.

- Connection to the subconscious with the thetameditation.
- Why we create the things and situations in our lives and how we benefit from them.
- Recognition and resolution of blocking beliefs, fears, phobias, etc.
- To sharpen the perception for companions and guardian angels and to work with them.
- Introduction to manifesting in your life
- Future readings
- Healing of body, soul and spirit
- Intuitive body readings
- Creating feelings

You want to learn the technique to get to know your subconscious, to speak to them in his language and to actively reprogram it for your highest and best benefit. This is what you learn in these three seminars. I therefore recommend booking this combination package. It includes the three seminars at a special price and during the three seminars 6 additional coaching sessions are included so that the emerging topics can be solved efficiently and safely. After successfully completing the three seminars, you will be able to work with yourself for simple everyday problems. Therefor you have acquired a first aid kit for their souls.

### Advanced DNA

Prerequisite: Basic DNA

In this advanced course you will go deeper into the Seven Levels of Existence that surround us. You will learn the correspondences of the individual levels and do exercises on them. You will learn methods to dissolve and let go of old resentments and obligations. You will learn how to "send love into the womb" and "heal the broken soul" with the action. They receive downloads of feelings that can bring them clarity and healing.

This course is a wonderful experience that will fill you with many new and positive feelings. The aim of the course is to live completely in the now and to get a feeling for what it means to accept oneself completely in unconditional love.

Other topics and exercises concern questions such as:

- How do you free yourself from old oaths?
- How do you work with fear and feelings?
- What is the basic belief (in-depth exploration of patterns)?
- How can I let go of rejection and regret?
- What are the awakened masters?
- What are free flowing memories?
- How do you talk to the Higher Self?

## **Dig Deeper**

Prerequisites: Basic DNA, Advanced DNA

The ThetaHealing technique is excellent for finding out the origin of a problem/blockage by using the "digging" technique. This questioning technique allows us to easily discover the elusive and deep subconscious thoughts and beliefs that block us. The ThetaHealing technique uses unconditional love, faith and emotion work to change them.

This seminar is designed to give all ThetaHealers a solid foundation in this basic technique and to give them security in the trenches. You will learn tips and techniques so that you can find the basic beliefs of your clients and yourself safely and quickly. Only when you can successfully identify the core and origin of a problem will you know how to change the basic belief. If the basic belief is not found, changes can be short-lived and the negative beliefs re-create themselves and are an obstacle to the whole healing process.

This seminar will enable you to help your clients understand their own behavior and life, and by supporting healing changes, clients will be able to leave the sessions balanced and clear.

With the completion of the Dig Deeper Seminar you will have in-depth knowledge and experience to do faith work on yourself and others. You will be able to use the techniques you learn to find and uncover the hidden beliefs that each one of us has. Under the guidance of your teacher you will have enough time to practice this course.

## **Manifesting and Abundance**

Prerequisites: Basic DNA, Advanced DNA, Dig deeper

In ThetaHealing®, the concept of manifesting is the belief that it is possible to create something in the physical world through the direct connection to the creation energy. Every statement, thought and action reflect what we create in our lives. Every decision reflects what we choose to create in our lives. Everything we think and say has a direct impact on whether our manifestations are for our benefit or our harm. If you constantly say that you are poor, then you will be poor. However, if you keep saying and thinking that you are financially independent, you will be. It is of the utmost importance to always remain in a positive way of thinking.

The truth is that we create our own reality and it is possible to manifest the best the world has to offer. However, you must first decide what you want in your life. Do you dream of living life the way you want to live it? Many have the dreams but not the reality to create them, despite a long search.

This course uses an amazing questionnaire to help you find the many surprising and deeply hidden blocks that stand between you and your goals. The course shows you how to ditch these and resolve. You will learn about goals and the divine time, just as you can let everything in your life work for you. You will then get all the positive feelings you need to create abundance in your life.

In this seminar you will learn how to dissolve these possible blockages, how to make a plan to set goals and pursue your ideas to make them successful. This is not a manual to get rich quickly, but much more a universal tool for self-development to achieve your potential of abundance, abundance and wealth in all aspects of your life.
